

Additional Product Instructions & Illustrations

Dritz®: 12" Specialty Ruler (item #44088)

What is it?

It is a lightweight aluminum ruler, designed with an extra 1/4" at each end to ensure accurate 1" and 12" measuring. Each side is different, with SIDE ONE offering both inch marks and centimeter markings as well as holes to create circles. SIDE TWO includes inch and 15° incremental angle markings – great for foundation quilting, paper piecing, general pattern making, crafts, and home decor projects.

How do you use it?

- On SIDE ONE, use the small holes located below inch marks to easily and accurately draw full-inch circles (example: 2") with a fine-tip pen, mechanical pencil or fine-tip awl.
- On SIDE ONE, use the eight holes located between 0 and 7/8" to draw circles with a fractional radius (example: 2-3/4").
- On SIDE TWO, use the 15° incremental angle markings, that fan out from the lower left corner, to draw angles. These are great for quilting and other small design shapes.
- On SIDE TWO, there are inch marks with both 1/4" and 1/2" increments.

See the Dritz tutorial "How to use the Dritz 12" Specialty Ruler" for more detailed information on this ruler's great features!
