Dritz® Home: Metal Corner Legs (item #44707)

What are Metal Corner Legs?

Metal corner legs are replacement legs for furniture. Do you have a favorite dresser that could use a little TLC—or perhaps a great flea market furniture find that's just begging for an update? Well, these legs are for you.

How do you use them?

1. Legs are designed to be placed at the bottom of a piece of furniture, one per corner. They require a flat piece of solid wood at the base on which to attach the legs. Examine base of the piece of furniture, adding a piece of wood to reinforce the corners if needed.
2. **Attaching the Legs:** Turn the piece of furniture bottom side up. Position the flat top edge of leg against the corner of the wood. Use pen to mark screw hole positions. Use a drill to drill a hole at each position. Use a screwdriver to attach the screws.
